WE BELIEVE TECHNOLOGY TO BE THE VEHICLE

HEIMDAL™
SECURITY

Heimdall Email Fraud Prevention

Prevent CEO fraud and Business Email Compromise (BEC) attacks

Eliminate imposter and insider threat due to BEC scams. Focus just on growing your business.

BEC attacks are a form of social engineering. They prey on people's trusting and cooperating nature in order to cause damage. Heimdall™ Email Fraud Prevention can now apply technological expertise to scan for all possible cues and detect BEC attempts in time.

Heimdall Email Fraud Prevention module features:

- Monitoring of all emails alongside existing email filter solutions
- Detection of BEC, CEO fraud, phishing, and advanced malware
- Finding imposter threats such as modified invoices
- Scans content of attachments in-depth – looking at wording, IBAN, SWIFT, Account Numbers, etc.
- Live-monitoring and alerting from a 24/7/365 specialist fraud team
- Proactively alerts you if a historical email is detected as malicious
- Connect to external invoice approval system using APIs

Heimdall Email Fraud Prevention uses more than 125 vectors of analysis and is fully coupled with live threat intelligence to find and stop business email compromise (BEC), CEO fraud, phishing and complex malware. It works on top of any existing mail filtering solutions on Office 365 and Outlook for desktop.
